City Pleased with Canadian Bio-Coal Announcement

Terrace, B.C., June 10, 2010 - The recent announcement from Canadian Bio-Coal Ltd. regarding their intention to establish a bio-coal production facility in Terrace is welcome news to the City of Terrace.

"I am very pleased with this announcement and believe it is great news for the residents of Terrace." said Mayor David Pernarowski. "The facility will provide direct employment opportunities, as well as spin-off jobs in the forestry sector and supply chain, to our region."

A number of Terrace organizations worked together to ensure this project came to Terrace. The Terrace Economic Development Authority, the Skeena-Nass Centre for Innovation in Resource Economics, and the Northwest British Columbia Forest Coalition worked cooperatively to convince Canadian Bio-Coal that Terrace would be an ideal location for their operation.
