City of Terrace – Active Transportation Plan Backgrounder

The City of Terrace is preparing an Active Transportation Plan and we need your input! Terrace is vibrant community that values active living and a clean environment. In the most recent municipal election residents expressed a desire to continue to build and support healthy choices for everyday transportation and commuting. To that end the City is developing an Active Transportation plan.

What is an Active transportation plan?

Our Active Transportation Plan will provide updated network maps, policy direction and an implementation plan for the City. It will identify initial easy gains such as areas for improved cycling and pedestrian signage, education and programming. An effective plan will provide a framework for better integrating the various modes of getting around with key community destinations.

What is Active Transportation?

Active transportation can be defined as “all human powered forms of travel such as walking, cycling, jogging/running, in-line skating, skateboarding, use of a wheelchair or scooter, cross-country skiing, canoeing and kayaking and combinations with other modes such as public transit and car pooling”.

What do we want from you?

Please come out to help identify the issues, opportunities and constraints within our current transportation system and create this plan. The evening will start with a short slideshow at 7:00pm which will provide goals of the Active Transportation plan, an existing conditions overview and an initial look at opportunities and constraints for future improvements. This will be followed by interactive group mapping activities and discussion.

Hope to see you there!

Date: Thursday, July 30, 2009

Time: 7:00 – 9:00 pm

Location: Terrace Sportsplex – Banquet Room
