

WAY TO GO, TIM HORTON'S!

As part of Tim Horton's Keith Avenue renovations in 2008, they recognized the need for improved accessibility to their building, as well as to their disabled washrooms.

The new push-button door access is greatly appreciated as it makes it that much easier to get into the Keith Avenue Tim Horton's. One of the reoccurring comments over the years has been how heavy the doors are. This new feature makes it easier for all members of the community, but especially for persons who may be in wheelchairs or have other mobility needs.

The upgrades to the disabled washroom facilities are a huge improvement as well.

Thank you Tim Horton's!
