

YARD WASTE COLLECTION & Biodegradable Bags

The City of Terrace is limiting Yard Waste Collection to Biodegradable bags only, effective June 01st, 2008.

The popularity of the Yard Waste program has increased collection difficulty and is impacting the health and safety of workers. Yard Waste in regular bags after that date will not be collected.

Bags must be strong enough and must be filled in such a way that they can be easily picked up by one person. Using weak bags, filling them with grass too soon, or leaving them in the weather may all contribute to breakage on collection day. The City will not collect biodegradable bags that break before or during collection.

Existing rules about acceptable materials (grass clippings, leaves, garden trimmings), weight limit of 22 Kg., etc. still apply.

We thank you for your help in making this program successful.
