

Terrace Downtown Improvement Area Facade Improvement Program

New Covid-19 Program Revisions.

In response to the impact the Covid-19 pandemic is having on business in Terrace, TDIA and the City of Terrace have amended the Facade Improvement Program for the year 2020 to include reimbursement for Covid-19 interior “return-to-work” upgrades.

Businesses in the Terrace Downtown Improvement Area that are doing, or have done, Covid-19 interior upgrades to improve safety measures can apply to TDIA's Covid-19 program. For successful applicants, TDIA will match dollar for dollar a reimbursement grant up to a maximum of \$1,000 per business.

The Covid-19 interior retrofits must align with the safety requirements for reopening (ie: plexiglass, barriers, dividers, etc.). The program will not support interior improvements outside the Covid-19 specific updates and cosmetic enhancements are not eligible (paint, fixtures, etc.)

Applying for Covid-19 interior upgrades in 2020 will not affect a future application for exterior renovation funding in a future year.

This is a first come first served application for funds available during the 2020 year and funds are limited.

Applications are available on the TDIA website at tdia.ca.
