

NEWS RELEASE –TERRACE & DISTRICT AQUATIC CENTRE UPDATE

Terrace, BC

The City of Terrace would like to provide the following update on the Terrace and District Aquatic Centre Project to the community:

City of Terrace project staff identified a deficiency in the tile works around the edge of the Main Pool. This deficiency was reviewed by an inspection association and is rendered significant enough to create an immediate delay in the Substantial Completion process. City Staff are disappointed in this finding when working towards substantial completion, and the City cannot respectfully accept the facility back into possession for operation.

The City's project team is working diligently with our prime contractor, Viking Construction, to rectify the issue. We will provide more information on the length of delay as well as a date for potential opening to the public once we have a full schedule.

The repair of this deficiency does not add any further cost to the project.
